DR. S. HEERSINK TOP PRODUCER IN

U.S. WITH NEW APTHERA™ IOL LENS

this new lens option to patients in early March and recently performed his 100th IC-8® Apthera™ Lens implant. With the power of small aperture technology, the IC-8[®] Apthera[™] lens is a replacement lens exclusively designed to help cataract patients with and without a low amount of astigmatism to achieve a clear, continuous range of vision from near to far. The Apthera IOL is intended for use in just one eye and is paired with a monofocal or monofocal toric (astigmatism-correcting) IOL in the fellow eye. WITHOUT APTHERA IOL WITH APTHERA IOL
